

Tania Ingerson

Creative Photographer & Author

“There is a unique sensitivity to Tania Ingerson’s photographs reminiscent of the great Australian Impressionist painters of the 19th and 20th centuries. For Ingerson, the use of the camera actually seems more akin to that of an artist’s brush - delicately inscribing her vision of nature, the bush and the occasional object onto her photographic canvas.”

“Tania’s current work is a hyper-real look at nature, something she is passionate about encouraging others to preserve”.

“Tania wanted to capture the brighter, more colourful perception that lives in people’s memories, and her technological background was perfect to help create that.”
